

VOLTEX® MAX SMART HYBRID ELECTRIC HEAT PUMP WATER HEATER WITH HOT WATER+ TECHNOLOGY

The Voltex MAX Smart Hybrid Electric heat pump water heater from A.O. Smith can deliver more hot water with innovative smart valve technology. Voltex MAX combines annual savings of more than \$600 per year on utility savings bill with more modes for customized hot water usage.

HOW DO THEY WORK?

- Absorb ambient heat from the surrounding air to heat water using a compressor
- Self-contained heat pump unit is integrated into the top of the tank
- Backup electric elements can supplement the heat pump depending on operating mode, environmental conditions and hot water demand

EXCEPTIONAL ENERGY EFFICIENCY

- Improved efficiency up to 3.88 Uniform Energy Factor (UEF) can reduce the cost of water heating by up to 75%*
- Heat pump can work down to 37°F ambient for more days of high efficiency operation

MORE HOT WATER

- Choose from three Hot Water+ levels for up to 40% more hot water than a standard heat pump
- Guest Mode provides maximum hot water for up to seven days
- Innovative digital smart valve

iCOMM® SMART CONNECTIVITY

- Monitor and control your water heater through the free A. O. Smith app
- Connect through a local Wi-Fi network or directly to the water heater through Bluetooth
- If applicable download the Time of Use schedule of your local electric utility to prioritize heating when the rates are most affordable
- Receive alerts and notifications

LEAK PROTECTION TECHNOLOGY

- Our Coregard™ Anode Rod have a stainless steel core that extend the life of the anode rod allowing superior tank protection far longer than standard anode rods
- Smart sensor leak detection and automatic water shutoff for added peace of mind and enhanced protection

WHISPER QUIET OPERATION AT 45 dBA

- No vibration isolation kit required

FLEXIBLE DESIGN

- Contractor preferred top water connections
- Zero clearance required on sides and back to fit in tighter spaces
- 450 ft³ space requirement is lower than other heat pump water heaters plus integrated ducting adapters for easy installation in smaller spaces
- Ideal for basements, utility rooms or garage installations; the compressor transfers heat to the water while dehumidifying and cooling the ambient air

MULTIPLE OPERATING MODES

Choose from multiple modes to match water heating needs and environmental conditions. Use Hot Water+ in conjunction with other modes to customize the amount of hot water for daily operations

STANDARD MODES:

Hot Water+ levels can be used to customize the amount of hot water for daily operations

- Hybrid (Default): Hot water delivery balanced with energy saving performance
- Heat Pump: Maximum energy efficiency

TEMPORARY MODES:

- Guest: Provides maximum hot water for up to seven days
- Electric: Uses only the electric heating elements
- Vacation: Reduce energy use while you are away

ADVANCED QUALIFICATIONS:

- ASSE 1082
- California Title 24 JA13 Qualified
- CTA-2045 (AC)
- ENERGY STAR®
- HUD Compliant
- NEEA Tier 4
- OpenADR 2.0b VEN
- Utility Demand Response Advanced Load-Up Capable

OTHER FEATURES:

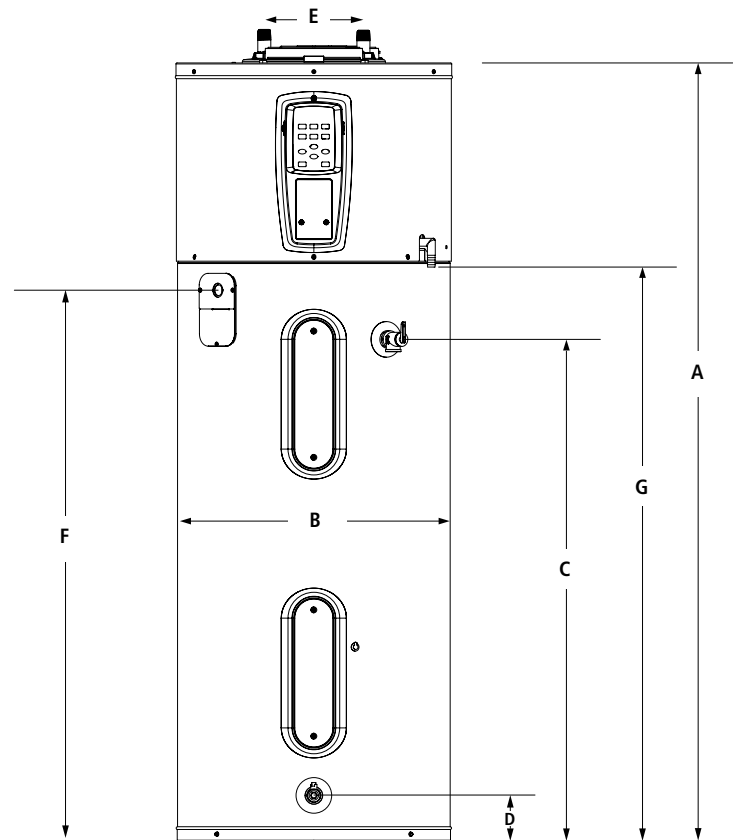

- Easily accessible front mounted junction box
- Environmentally-friendly, non-CFC foam insulation
- Durable, enhanced-flow brass drain valve
- CSA certified and ASME rated temperature & pressure relief valve

OPERATING REQUIREMENTS:

- Requires provision for non-acidic condensate draining; if a suitable drain is not available a condensate pump is required
- 208/240 VAC 60Hz single phase 30 amp power supply

10-YEAR LIMITED WARRANTY

- For complete information, consult written warranty or go to hotwater.com

450 FT³ ENCLOSED ROOM SIZE IS 35% SMALLER THAN OTHER MANUFACTURERS REQUIRE

			
Configuration	Enclosed Room	Fully Louvered Door	Upper and Lower Louvers in Door ^{1,2}
Minimum Space (FT³)	450	84	84
Space Example L x W x H (FT)	6 x 7.5 x 10	3 x 2.8 x 10	3 x 2.8 x 10

			
Configuration	Upper Louver and Undercut Door ^{1,3,4}	Inlet OR Outlet Ducting and a Single Louver OR Undercut Door ^{1,3,4,5}	Inlet AND Outlet Ducting ⁵
Minimum Space (FT³)	84	No minimum space requirement	No minimum space requirement
Space Example L x W x H (FT)	6 x 7.5 x 10		

¹Minimum louver size is 130 in² free area each.

²When two louvers are installed, install one louver at the top of the heater and the other close to the floor.

³Undercut door should have a minimum of 0.75" clearance. (minimum 18 in² air gap)

⁴When one louver is installed, install the louver in a location close to the top of the heater.

⁵This heater supports multiple duct diameters as well as rigid and flex ducting options. See manual for more information.
