

More Hot Water. Less Hassle. Proven Savings.

# VERTEX™ VERSATILE POWER DIRECT VENT

## SERIES 400 HIGH EFFICIENCY GAS WATER HEATER

Introducing the A. O. Smith Vertex™ Versatile Power Direct Vent, a high efficiency gas water heater designed to deliver continuous hot water and premium performance inspired by our proven Cyclone® commercial technology. It achieves up to 96% thermal efficiency, helping homeowners heat more water while using less energy. With AiQ™ Adaptive Gas Technology, it automatically adjusts for optimal combustion and can be set to run on natural gas or liquid propane during installation.

The fully condensing Vertex design is so advanced, it can deliver hot water at a constant flow of over 4 gallons per minute. Plus, it's backed by an 8 year limited warranty covering both tank and labor. The Vertex™ Versatile Power Direct Vent is the reliable, energy saving solution.

### INNOVATION

Long-lasting supply of hot water, even where the water supply temperature is colder

### ENERGY EFFICIENT

96% Thermal Efficiency

### ADAPTIVE GAS TECHNOLOGY

Can run on either natural gas OR liquid propane – stock one heater to fit any home

### LEAK DETECTION MODULE

Will alert the home owner to water at the heater

### POWERED ANODE

Now standard for the ultimate tank protection

### 8 YEAR WARRANTY

For both the tank and the labor
